Instructions :

In Each PSD File you open you will find full layered groups layer with full options , you can edit them with a right click because template is fully Customizable. Feel free to Contact me Through my Profile if you need Support or some things are not correct I will help you.
There are some tips you need to know:

1. If you need to change text you have to choose Type Tool and then click on a text so you will able to change it.
2. If you need to put in your image you have to open your image file in Photoshop. Then you need to push Ctrl + A so whole file will be selected. After this you need to choose Move Tool and drag your image into PSD file. Then you need go to Layers Window

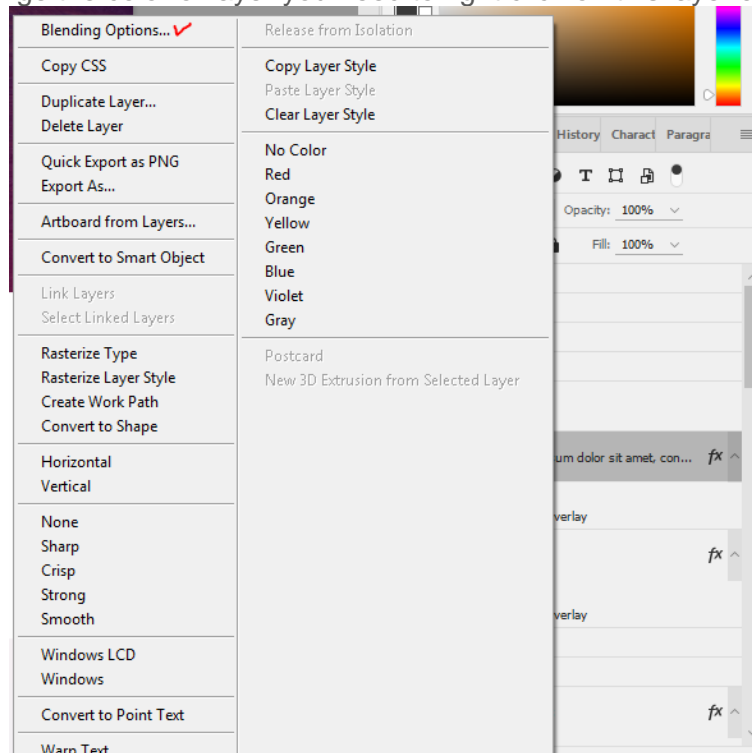

and put your image in right group. Finally you can choose the Move Tool and drag your image in any place of your PSD file.

3. If you want to change the color of layer you need to right click on this layer and then choose

Blending Options.

Then you need to choose Color Overlay and click on color rectangle so you will able to change it.
